PROFESSIONAL SUMMARY

BICT (Hons) undergraduate at the University of Vavuniya with a strong interest in Full Stack Development and a focus on building practical web applications. Strong foundation in software development, database design, debugging, software testing, and the Software Development Life Cycle (SDLC). Hands-on experience in frontend and backend development, responsive web applications, REST API integration, MySQL, Node.js, PHP, HTML, CSS, and JavaScript. Familiar with Git/GitHub, Agile practices, and team-based software development. Seeking a Full Stack Developer Intern position to apply technical skills, contribute to web development projects, gain industry experience, and further develop full-stack development expertise.

CORE COMPETENCIES

Software Development Life Cycle (SDLC) | Full-Stack Development | Database Design | Debugging & Troubleshooting | REST API Integration | Version Control (Git/GitHub) | Agile Teamwork | Software Testing & QA | Problem Solving | Distributed Systems Fundamentals

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript, PHP

Frontend: React.js, Bootstrap, Tailwind CSS, Flexbox, Responsive Design, Figma

Backend: Node.js, Express.js, PHP, REST APIs, Axios, Fetch API, JSON

Databases & Tools: MySQL, MongoDB, Git, GitHub, VS Code, XAMPP, Postman, npm, monday.com

Designing Tools: Figma, Canva

PROJECTS

Staff Management System - Software Engineering

2026 – personal project

PHP, MySQL, HTML, CSS, JavaScript

- Designed and developed front-end and back-end functionality across 4 core modules (staff list, add, edit, attendance) in a full-stack PHP/MySQL application, streamlining daily staff management workflows
- Debugged and resolved multiple ID-parsing bugs and prepared-statement type mismatches, increasing application reliability and reducing display/edit errors
- Architected core system files (db.php, auth.php, shared header/footer, style.css, script.js) and managed version control via Git and GitHub, resolving remote history conflicts to maintain a stable, deployable codebase
- GitHub: github.com/MFMfawsan/staff-management-system

Employee Mood Tracker - Software Engineering

2026 – personal project

PHP, MySQL, HTML, CSS, JavaScript

- Designed and built a full-stack web application that lets employees record and visualize daily mood trends, giving clearer insight into workplace well-being through a simple, accessible daily flow
- Implemented responsive, mobile-first layouts and clean UI/UX patterns, ensuring consistent usability across devices and screen sizes
- GitHub: github.com/MFMfawsan/mood_tracker

EDUCATION

BICT (Hons) in Information and Communication Technology

2023 - Present

Faculty of Technological Studies, University of Vavuniya, Sri Lanka

CERTIFICATIONS

- Front-End Web Development - E-Certificate, University of Moratuwa Open Learning
- Web Design for Beginners - CODL, University of Moratuwa, Sri Lanka

LANGUAGES

Tamil - Native | English - Fluent | Sinhala – Fluent
